

Stomp Out Bullying was created in 2005 to address the issues of bullying and cyberbullying. The goal of the program is to change the culture for students, and to help with prevention of bullying by educating children and adults. Together we can put an end to this and keep all of our children safe. Here at School Number Five we recognize **UPSTANDERS** in fifth-grade that stand up to bullying, make good choices, leave no one left out and are on their way to become amazing student leaders.
